Circular

Difficulty
Easy

Time required
3H 30

Length
7.23 KM

Features

Information

DESCRIPTION

On this easy climb hikers will encounter evidence of past logging activities and discover low altitude forest species.

This hike winds along a comfortable path where you will find two examples of past forest activities, logging and charcoal production.

The path goes through some well-preserved mountain settlements and leads to panoramic viewpoints over the majestic Maggia River basin and inside remote corners of Valle di Lodano. On this journey you will come across forest types characteristic of lower altitudes.

Tips

Hiking boots

Sun cap

Water-bottle

Sunglasses

Sun cream

Hiking map

Camera

Food

Montagnepulite: This project was born to promote an effective management and sustainable use of mountain huts in Ticino, and in particular the litter management. The responsible management of litter in the mountains is a matter of common sense. We can all contribute:
